REASONS FOR ALLOWANCE

AND

EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination a method of implementing data communication between two devices involving a wireless connection via two sets of software, wherein

at least part of the communication is carried out by means of method calls, each of which includes a service request;

each device has at least some programs implemented in a script-based programming language for establishing a connection to a telecommunication system;

a service broker is used for supplying a service request to a server that offers the service request during the communication, wherein both the server and the service request are derived from the method call, said server responds to the method call according to the service needed by sending the information required by the service to the service broker, the latter then sends the information to the sender of the method call; and

an adapter (i.e., a certain application) is employed between the sender of the service request and the service broker for interpreting or translating the service requests

and server responses so as to make the transmitted information understandable and compatible between the script-based software and another system.

- 2. Claim 5 is an independent method claim with all the aforementioned limitations. Claim 1 is another independent claim describing the arrangement for implementing the method in a network environment. Since the features recited above are all included in claims 1-8, they are allowable for the same reasons set forth above.
- An examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable, an amendment may be filed as provided by 37 C.F.R.
 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.
- 4. In the Abstract: delete the phrase "(Figure 5)" from line 16.
- 5. Pursuant to MPEP 606.01, the title has been changed to read:
- -- ADAPTER FOR RENDERING DATA TRANSMISSION REQUESTS AND RESPONSES COMPATIBLE BETWEEN THE REQUESTING CLIENT AND ITS TARGET SERVER IN A WIRELESS COMMUNICATION ENVIRONMENT--.
